ACTIVITY A2
Assess Significance, Risks and Opportunities

Assess environmental impacts and EMS risks/opportunities using transparent criteria.

Participant scenario and completion checklist

Version 8.0 | 20 August 2026

Scenario

MEP's departments use different rating scales. Production prioritises cost, Facilities prioritises spill prevention, and Sales prioritises customer carbon requests. Leadership needs one defensible method.

Organisation: Meridian EcoPack Pte Ltd (MEP) is a fictional Singapore SME with 120 employees producing printed corrugated and fibre-based packaging for regional food, electronics and healthcare customers.

Your task

Score MEP's aspects using severity, likelihood, compliance exposure, stakeholder concern and control effectiveness, then test sensitivity.

Expected output: A significance matrix, prioritised aspects register and risk/opportunity action shortlist.

Decision questions

1. Which criteria make the decision repeatable without pretending that one score is scientific certainty?

2. Which legal or stakeholder triggers should override a low numerical score?

3. How do inside-out environmental impacts differ from outside-in environmental conditions affecting the business?

Completion checklist

Done	Check	Evidence/reference
[ ]	Agree definitions and anchors for severity, likelihood, compliance exposure, stakeholder concern and existing-control effectiveness.	
[ ]	Score independently before discussing to expose inconsistent assumptions.	
[ ]	Apply the stated formula and mandatory-override rules; document the evidence behind each score.	
[ ]	Rank significant aspects and separate inherent significance from residual risk after controls.	
[ ]	Identify at least one risk and one opportunity linked to each priority aspect.	
[ ]	Run a sensitivity check by changing one uncertain score and record whether the priority decision changes.	
[ ]	Conclusions are traceable; assumptions, uncertainties and missing evidence are labelled.	
[ ]	A peer challenged one material decision and the response is recorded.	
[ ]	The output passes the acceptance test below.	

Acceptance test

Priority aspects are produced by the approved criteria and override rules; scores have evidence/rationale, uncertainties are visible and opportunity actions are not confused with positive impacts.

Submission and debrief

Submit the completed workbook using the trainer's naming convention. Be ready to defend one decision with evidence, explain one uncertainty, and state what would change your conclusion.
