ACTIVITY A3
Build the Compliance Obligations Register

Determine applicable obligations, ownership, evidence and escalation routes without making unsupported legal conclusions.

Participant scenario and completion checklist

Version 8.0 | 20 August 2026

Scenario

MEP holds licences and service contracts in separate folders. A customer code, wastewater conditions, hazardous-substance storage controls and waste records are not linked to process owners or evidence.

Organisation: Meridian EcoPack Pte Ltd (MEP) is a fictional Singapore SME with 120 employees producing printed corrugated and fibre-based packaging for regional food, electronics and healthcare customers.

Your task

Screen MEP's activities against Singapore environmental obligation categories, customer commitments and permit conditions.

Expected output: A compliance obligations register, applicability rationale, evidence map and escalation log.

Decision questions

1. Which obligations are mandatory, which are voluntary commitments and which require specialist confirmation?

2. How does each obligation apply to a specific aspect, activity, site or contractor?

3. What evidence demonstrates current status and who must be told when a potential breach is found?

Completion checklist

Done	Check	Evidence/reference
[ ]	List each significant aspect and identify possible statutory, permit, contract, customer and voluntary sources.	
[ ]	Consult current authoritative sources and record the source, issue date, review date and responsible reviewer.	
[ ]	Write a plain-language applicability statement and link the obligation to process, aspect and control.	
[ ]	Define evidence, frequency, owner, evaluator and escalation route; mark any item requiring legal or technical advice.	
[ ]	Test three sample records against the stated obligation and record compliant, noncompliant or insufficient-evidence status.	
[ ]	Schedule change monitoring and a periodic formal evaluation of compliance.	
[ ]	Conclusions are traceable; assumptions, uncertainties and missing evidence are labelled.	
[ ]	A peer challenged one material decision and the response is recorded.	
[ ]	The output passes the acceptance test below.	

Acceptance test

Every register row has a source, applicability rationale, owner, evidence, review frequency and escalation route; unresolved interpretation is escalated rather than guessed.

Submission and debrief

Submit the completed workbook using the trainer's naming convention. Be ready to defend one decision with evidence, explain one uncertainty, and state what would change your conclusion.
