ACTIVITY A4
Set Environmental Objectives and Build Competence

Translate priority aspects into measurable objectives, action plans and role-based competence evidence.

Participant scenario and completion checklist

Version 8.0 | 20 August 2026

Scenario

MEP's policy promises resource efficiency and pollution prevention, but targets have no baseline, owners or response thresholds. Annual awareness slides are delivered without checking competence.

Organisation: Meridian EcoPack Pte Ltd (MEP) is a fictional Singapore SME with 120 employees producing printed corrugated and fibre-based packaging for regional food, electronics and healthcare customers.

Your task

Create an electricity/waste objective set and a competence plan for operators, supervisors, contractors and emergency roles.

Expected output: A SMART objective/KPI plan, action register, role-competence matrix and evaluation design.

Decision questions

1. Which indicators measure environmental performance, implementation progress and control effectiveness?

2. What resources, responsibilities, dates and evaluation methods make the objective executable?

3. What must each role be able to do, and what evidence shows competence rather than attendance?

Completion checklist

Done	Check	Evidence/reference
[ ]	Select two significant aspects and define the intended environmental result, baseline and data boundary.	
[ ]	Write measurable objectives with targets, dates, owners and assumptions.	
[ ]	Define KPI formula, unit, source, frequency, data-quality control and action threshold.	
[ ]	Build an action plan covering controls, resources, responsibilities, milestones and evaluation of results.	
[ ]	Map critical EMS tasks to role-specific competence and awareness needs, including contractors.	
[ ]	Choose evaluation evidence such as observation, drill performance, work sample or knowledge demonstration and set review dates.	
[ ]	Conclusions are traceable; assumptions, uncertainties and missing evidence are labelled.	
[ ]	A peer challenged one material decision and the response is recorded.	
[ ]	The output passes the acceptance test below.	

Acceptance test

Each objective links to policy and a priority aspect; KPIs are reproducible and decision-ready; every critical role has competence criteria, evidence method, owner and review date.

Submission and debrief

Submit the completed workbook using the trainer's naming convention. Be ready to defend one decision with evidence, explain one uncertainty, and state what would change your conclusion.
