ACTIVITY A6
Run an Environmental Emergency Tabletop

Determine, communicate and evaluate actions for a credible environmental emergency.

Participant scenario and completion checklist

Version 8.0 | 20 August 2026

Scenario

At 10:20 a forklift punctures a 600-litre water-based ink tote. Product flows toward an internal drain. One operator raises the alarm; the quantity released, drain destination and regulatory notification threshold are initially uncertain.

Organisation: Meridian EcoPack Pte Ltd (MEP) is a fictional Singapore SME with 120 employees producing printed corrugated and fibre-based packaging for regional food, electronics and healthcare customers.

Your task

Respond to an ink-tote spill near a storm-water drain while protecting people, the environment and evidence integrity.

Expected output: A time-stamped response log, notification decision record, containment plan and post-drill improvement actions.

Decision questions

1. What must happen in the first 5, 15 and 60 minutes, and who has authority to act?

2. Which conditions require internal escalation, external notification or specialist confirmation?

3. What evidence must be protected for recovery, investigation, compliance evaluation and learning?

Completion checklist

Done	Check	Evidence/reference
[ ]	Assign incident controller, safety, containment, communications, facilities and recorder roles.	
[ ]	Read the initial inject, stop unsafe work, raise the alarm and establish immediate human/environmental protection priorities.	
[ ]	Identify the substance, quantity, pathway, receptors and control points; isolate the source only when safe.	
[ ]	Deploy drain protection and spill containment conceptually using the site plan and available resources.	
[ ]	Use the notification decision tree, record uncertainties, obtain competent advice and make time-stamped communications.	
[ ]	Plan waste recovery, clean-up verification, restoration and evidence retention.	
[ ]	Debrief against objectives; log corrective actions, owners, dates and the next drill or competence check.	
[ ]	Conclusions are traceable; assumptions, uncertainties and missing evidence are labelled.	
[ ]	A peer challenged one material decision and the response is recorded.	
[ ]	The output passes the acceptance test below.	

Acceptance test

The team protects people and receptors, records decisions and uncertainties, uses the approved escalation path, preserves evidence and converts drill findings into owned improvement actions.

Submission and debrief

Submit the completed workbook using the trainer's naming convention. Be ready to defend one decision with evidence, explain one uncertainty, and state what would change your conclusion.
