ACTIVITY A7
Evaluate Performance and Conduct an Internal Audit

Evaluate environmental performance, compliance evidence and EMS effectiveness through risk-based audit sampling.

Participant scenario and completion checklist

Version 8.0 | 20 August 2026

Scenario

MEP reports that waste diversion improved, but production volume changed and two months of wastewater data are missing. The prior audit programme covered every department equally and did not state objectives.

Organisation: Meridian EcoPack Pte Ltd (MEP) is a fictional Singapore SME with 120 employees producing printed corrugated and fibre-based packaging for regional food, electronics and healthcare customers.

Your task

Analyse MEP's six-month KPI data, sample control records and conduct a process-based audit before management review.

Expected output: A KPI interpretation, compliance-evaluation record, audit plan, evidence log and defensible findings.

Decision questions

1. What can the data support, what is uncertain and what requires normalisation or validation?

2. How is evaluation of compliance different from routine monitoring and from internal audit?

3. Does each finding state the criterion, objective evidence and gap without prescribing a solution?

Completion checklist

Done	Check	Evidence/reference
[ ]	Verify KPI definitions, boundaries, units, calibration/data-quality controls and missing-data treatment.	
[ ]	Normalise energy, water and waste measures to production where appropriate and interpret trends against thresholds.	
[ ]	Evaluate a sample of obligations using current evidence and record status, basis, evaluator and action.	
[ ]	Set audit objectives, scope, criteria, methods, timing and independence using risk and prior performance.	
[ ]	Follow one aspect from policy and planning through operation, monitoring, competence and improvement evidence.	
[ ]	Triangulate interview, observation and document evidence; write findings and conduct a concise closing meeting.	
[ ]	Prepare management-review inputs and decisions needed from the combined evidence.	
[ ]	Conclusions are traceable; assumptions, uncertainties and missing evidence are labelled.	
[ ]	A peer challenged one material decision and the response is recorded.	
[ ]	The output passes the acceptance test below.	

Acceptance test

Conclusions respect data limitations; compliance status is evidence-based; the audit trail is reproducible; every finding contains criterion, evidence and gap; training follow-up is tied to observed competence needs.

Submission and debrief

Submit the completed workbook using the trainer's naming convention. Be ready to defend one decision with evidence, explain one uncertainty, and state what would change your conclusion.
